Urological Check-up University Hospital Basel

Focus on your well-being

The urology department at the University Hospital Basel covers the entire spectrum of urological and urooncological procedures. Our internationally renowned specialists are on hand to help you with everything you need.

Check-ups are performed by physicians with many years of experience in this field and individually supplemented with specific additional tests.

The aim of the medical examination and health consultation is to determine risk profiles and detect urological health problems early on. This preventive screening enables early treatment and prevents the condition from progressing.
